The Advanced Analysis Library List

What is the Library List?

The Advanced Analysis Library List is an online listing of all of the parts contained in the library supplied with the Advanced Analysis tools. The information is arranged alphabetically by Device Type.

Most of these parts contain parameters that are required for the Advanced Analysis tools. If you plan on using the Sensitivity and Monte Carlo tools, choose parts with a Y in the TOL column. If you plan on using Optimizer, choose parts with a Y in the OPT column. If you plan on using Smoke, choose parts with a Y in the SMK column. Parts with a Y in the DIST column may be used for Monte Carlo.

The listings are divided into columns, like a spreadsheet, and show the following information about each device:

Device Type	Generic Name	Part Name	Part Library	Mfg. Name	TOL	OPT	SMK	DIST
The type of device (transistor, diode, etc.	The generic or standard industry name of the device.	The name of the part in the Advanced Analysis library.	The name of the Advanced Analysis library the part is stored in.	The name of the manufacturer of the device.	The type of parameter data included with the part. ¹			

1. TOL refers to tolerance parameters, OPT refers to optimizable parameters, SMK refers to smoke parameters, and DIST refers to Distribution parameters. A Y means the type of parameter is available in the part's model. An N means the type of parameter is not available in the part's model.

How do I use the Library List?

Finding a library

Use Acrobat Reader Bookmarks to jump to the library you want. If you do not currently see bookmarks on this page, choose Bookmarks and Page from the View menu. Click on the plus sign (+) next to the bookmark "Advanced Analysis Library," then click on the bookmark for a device type. For example, click on the bookmark "Analog Switches" and you will be jumped to the list of parts in the analog switch library.

Searching for a name

To search for a specific part name, library name, or any other text, use Acrobat Reader's built-in Find function. (From the Tool menu, choose Find and then enter the text you want to search for.)

What is the Library List Index?

The index lists all of the Advanced Analysis libraries in alphabetical order.
